PROFILE

I am a student in the field of Information Technology with a specialization in web development and programming. Skilled in HTML, CSS, JavaScript, PHP, MySQL, Laravel, React, Next.js, Dart, Flutter, and Lua. I am enthusiastic about learning and continuously improving my skills. I am ready to face new challenges in the professional world and contribute effectively as part of a team.

EXPERIENCE

Membuat Game dengan Roblox Studio menggunakan bahasa LUA   2024

- Developed a war-themed game using Lua programming language in Roblox Studio. Focused on scripting gameplay mechanics, user interface, and interactive elements to enhance player experience.

Catering E-commerce Website (2024)   2024 - Present

- Created an online platform for a food catering business, allowing customers to browse menus and place orders. Utilized CRUD operations, Laravel Blade templating, and a clean UI/UX for easy navigation and order management.

Online Pharmacy Website   2024

- Developed a functional e-commerce platform for a pharmacy using PHP, MySQL, and Laravel. The website includes product listings, shopping cart, and user authentication features. Implemented MVC architecture and database optimization.

40 Game Educational Project with Flutter   2024 - 2025

- Participated in the development of 6 educational games as part of the 40 Game Project using Flutter. Focused on interactive design, state management, and game logic implementation to enhance learning experiences for students.

CERTIFICATE

Linux System Administration
By completing the Adinusa course

Docker Fundamental
By completing the Adinusa course
